

主講題目	Anabolic Agents as New Treatment Strategy in Osteoporosis
<p>摘要內容 (100~300字)</p> <p>用途：非刊登在 手冊中，僅用於 申請學分用。</p>	<p>This talk provides an overview of the current osteoporosis treatment landscape including various antiresorptives and anabolic agents. With the diverse treatment options available, clinical considerations such as BMD, fracture type, fracture risk, long-term treatment and other patient characteristics are important to guide the choice of management for osteoporosis. Risk stratification for high and very high risk of fracture will be discussed.</p> <p>With the recent approval of novel anabolic agent Romosozumab in Taiwan, this talk will also provide clinical evidences of Romosozumab and clinical experience through case sharing.</p>

主講題目	DXA Interpretation for Osteoporosis
<p>摘要內容 (100~300字)</p> <p>用途：非刊登 在大會手冊 中，僅用於申 請學分用。</p>	<ol style="list-style-type: none"> 1. DXA 應用於骨質疏鬆之診斷 2. DXA 診斷骨鬆之標準 3. 測量參考值資料庫 4. 骨折風險評估 5. 骨質密度追蹤 6. 病例討論 7. 骨質密度檢查結構式報告 8. 骨質密度測量之外：脊椎骨折評估(VFA)、骨樑評分值(TBS)
